

Final source-sampling convergence | thresholds are project-specific candidates, not universal laws

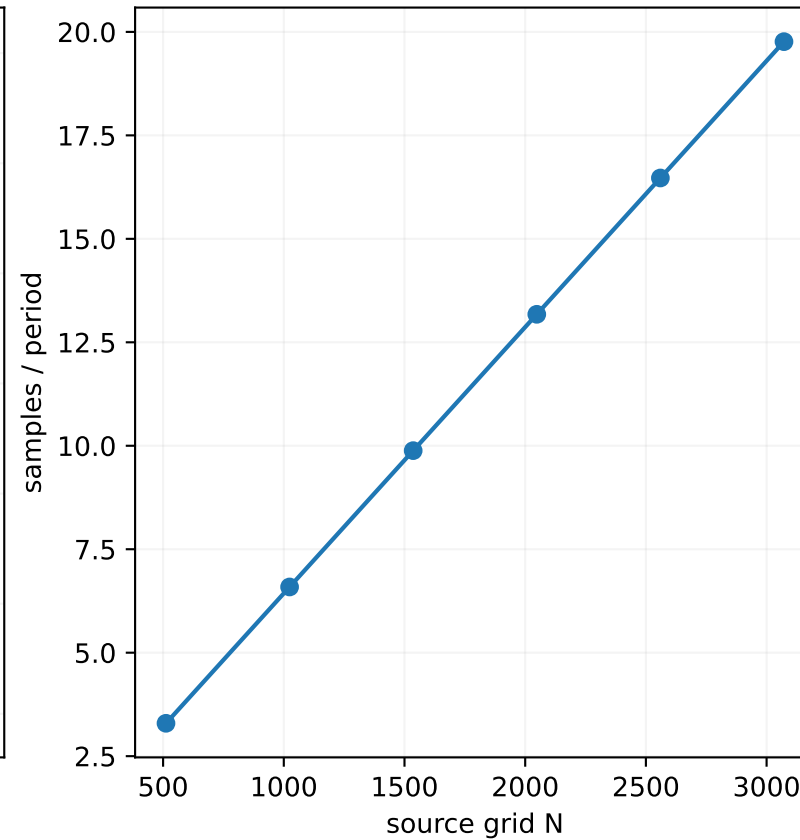

wrapped axicon phase | N512 left, N3072 right

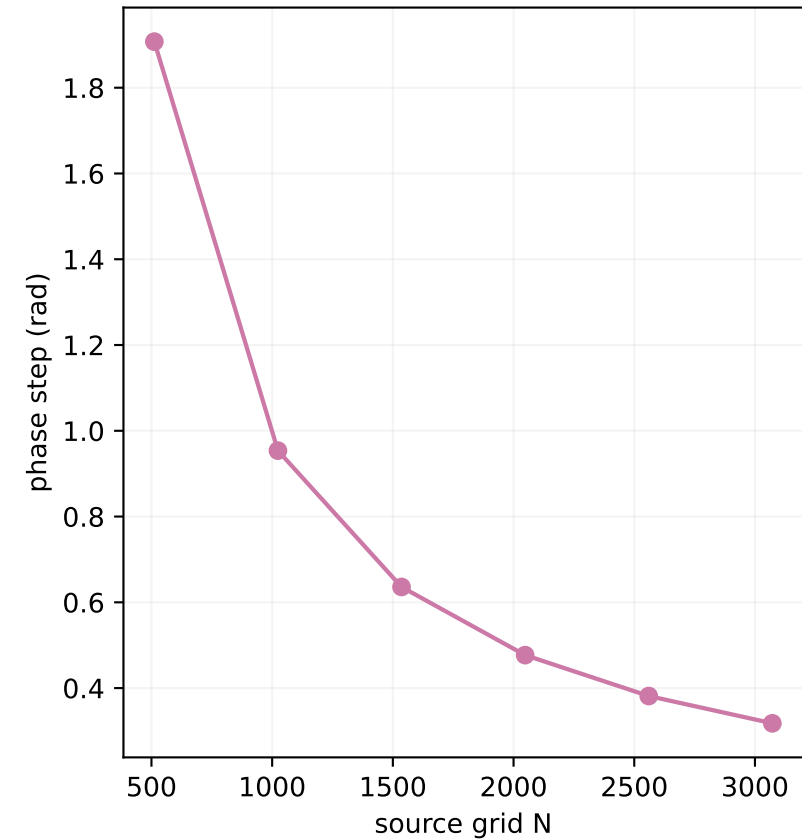

native radial phase samples

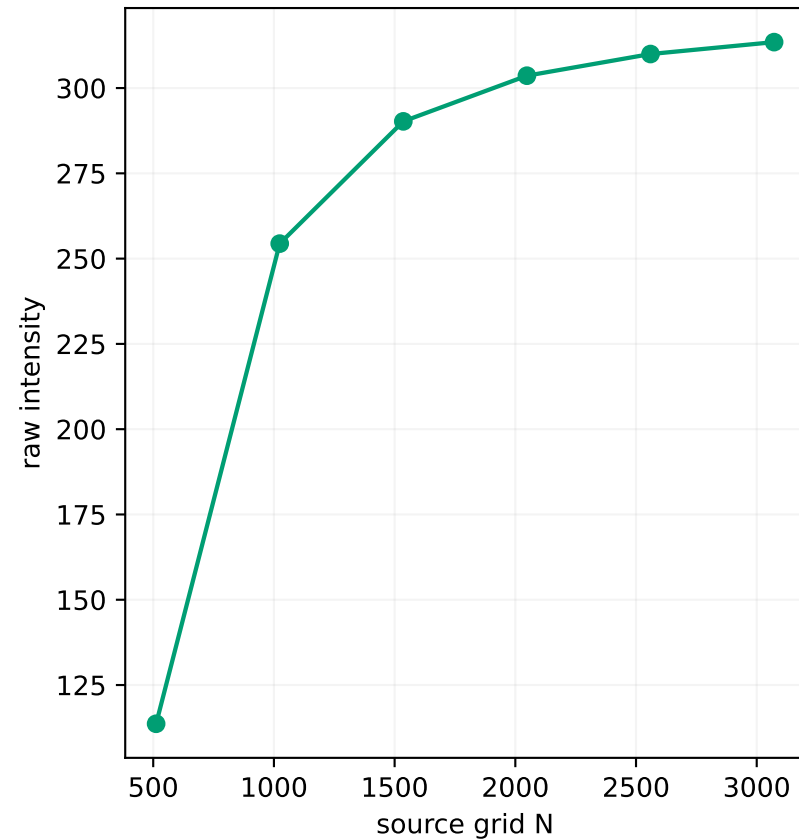

samples per radial period

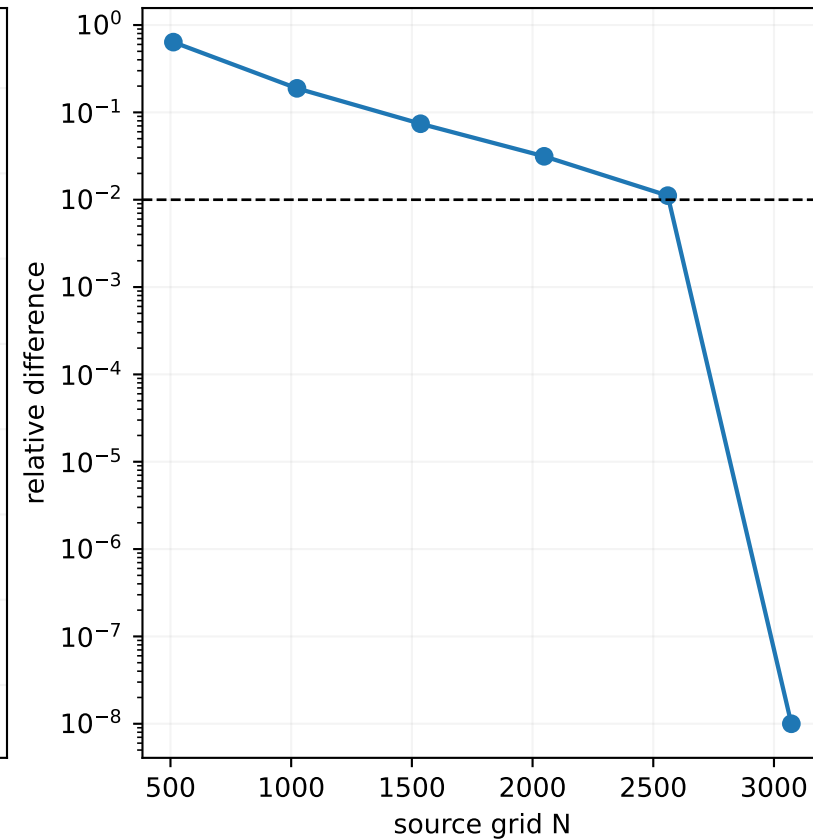

adjacent radial phase increment

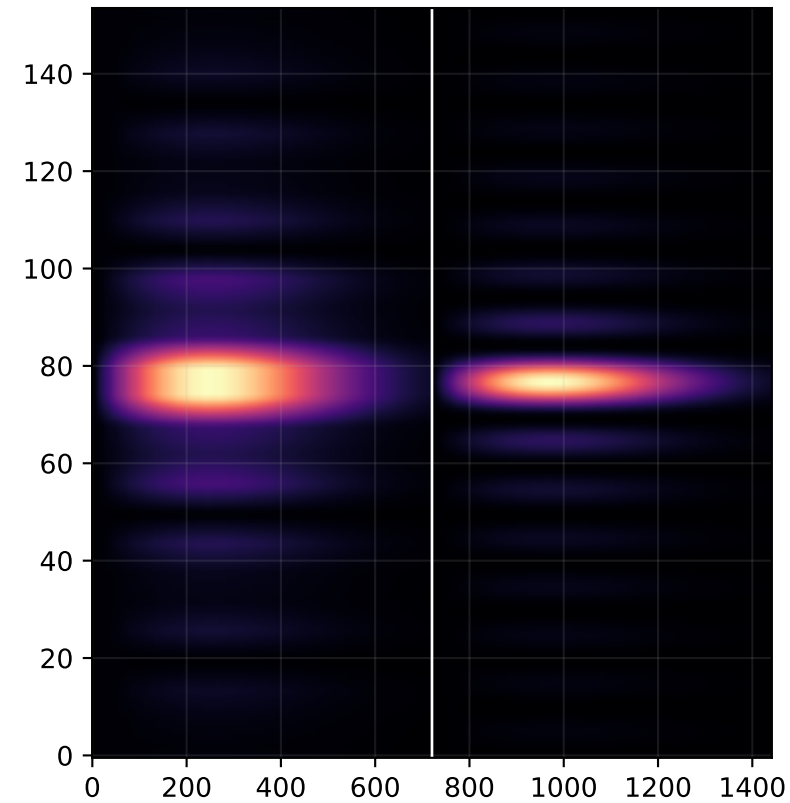

B0 raw on-axis intensity at z=60 mm

relative difference to N3072

N512 left versus N3072 right | matched detail

N3072 - interpolated N512
